## Learner Variability Project Resources

**The Learner Variability Navigator**
The Learner Variability Navigator (LVN): A free open source tool to make learning sciences research accessible for educators.
LVN Intro Video: An brief video introduction to the Learner Variability Navigator
LVP Homepage: Learn more about our project including research, impact, and resources related to the LVP

**Supporting Teachers**
What is Learner Variability?:  A white paper defining learner variability
Self-reflection guide:  A useful tool for educators to reflect on their own learner variability
Self-study guide for teachers: A great resource for supporting professional learning on learner variability.

**Tools:**
Learner Centered Design Tool: A useful tool that walks you through the factors and strategies to support learner variability in the classroom to create your own workspace.
Instructional Design Tool:  This tool allows you to create a heat map to understand how certain strategies are addressing learner factors.  Great for lesson planning and reflection.

**LVP in the Field:**
Culturally Responsive Practice Guide: A guide with reflection questions and protocols to support a whole child approach to culturally responsive practice.
Strengths-based IEP Tool & Guide:  A tool that leverages the LVN to support a strengths-based approach to IEP process.
Signature Workspaces:  A collection of workspaces created by teachers using the Learner Centered Design tool to showcase different ways they are addressing learner variability.
Product Certification:  Learn more about our process, how to get involved and which products have received the learner variability certification.
