TEACH Grant Recipient

First Name: Wendy Last Name: Myers

Student Profile:

As a new graduate education student and mother the TEACH grant has helped me afford to go back to graduate school and change careers. I've always loved working with students who required extra support to be successful and the teach grant allows my dream of teaching the students who need the most help. As a former ward of the State I have always had to depend on myself and haven't been able to count on outside support of family. I feel strongly that my future will be brighter for myself and young child because of the opportunity to further my education that this path provides for me. Without the availability of the TEACH grant I may not have been able to afford to go back to school and become a teacher.
