

I have known since my high school years that I wanted to be a teacher and impact student lives positively. When I heard about the Teach Grant program and how it offers support to those willing to teach in low income schools, I immediately signed up. I am so grateful that I am able to dispel some of my financial burden with this Grant and would encourage all education students to participate in it. I have been able to enjoy peace of mind knowing that a portion of my debt is taken care of. Teaching is a hard, yet extremely rewarding job. I am working to teach and help each of my students learn and grow into the people they are going to be. I am grateful for what the TEACH Grant has done for me and hope that it will continue to be available to assist students in the future.
