

As a full-time traditional student teacher, I needed all the extra time possible to stay on top of grading assignments and also completing tasks for the education seminar. This would not have been possible without the additional funding I received from the institution along with the TEACH grant. Thanks to financial assistance such as the TEACH grant, I was able to dedicate the extra time and attention to teaching my students and providing them with the constructive feedback to further their academic achievements. The grant allowed me to reduce the financial burdens of continuing education, allowed me to focus on completing my program and finally beginning my career in education.
